

## Experience expert knowledge.

For more than 30 years, the name WEBER-HYDRAULIK has stood for solutions which have been tested through practical use in the field of rescue. In addition to our innovative products, we also include the training and education of fire-fighters in our service and support spectrum. This approach makes it possible for us to accommodate the wishes and needs of our customers directly, and to promote our developments in a practical manner.

You can best discover the many advantages of our systems during a personal product presentation on site. Here you can experience for yourself all the benefits of WEBER HYDRAULIK products.

Further interest and information about the products and services of WEBER HYDRAULIK can be found quickest on our internet page at [www.weber-hydraulik.com](http://www.weber-hydraulik.com).

In the meantime should you have any further questions or wish to arrange a product demonstration, our sales team are always available whenever you require.

## Passion meets dynamics

The new generation of WEBER-HYDRAULIK power units

## The dynamics make the difference.

The new WEBER-HYDRAULIK power unit E/V50 T PLUS with its two integrated pumps is optimally designed for the simultaneous operation of two rescue devices. With 4.0 litres, the tank volume is measured in such a way that even after the deployment of several rescue cylinders (e.g. RZ 1, RZ 2 and RZ 3) the work with the rescue cutter or the rescue spreader is still possible. In addition to offering simultaneous operation of your two first strike tool, this power unit has the unique option of double speed "Turbo" operation of your chosen tool. This high oil flow function not only gives greater speed it provides even more more dynamics and tool momentum, e.g., when cutting.

Complete with 2 x 20 metre hose assemblies (1 x red, 1 x yellow) on frame mounted hose reels, this unit offers flexible and free range of operation. The reels are fitted with rewind handle and automatic brake which prevents unintended rolling out of hydraulic hose.

The complete unit is fitted with two large lift up handles, which ensures the complete system can be transported with ease.

## At a glance.

### WEBER-HYDRAULIK Power units E/V 50-T PLUS

- Simultaneous operation of 2 rescue devices possible
- Optional turbo function for quicker, more dynamic working with a rescue device
- 2 quick use reels with 20 meters hose each, rolling up device and automatic brake
- Large tank volume, 4.0 litre
- Rotary grips for simple transport
- Delivery rate max:  
1x5.4 l / min or 2x2.7 l/min
- Weight: 81.0 kg
- Working pressure: 630 / 700 bar
- Classification according to DIN EN:  
ATO - MTO
